NUTRIENT EFFICIENCY BIOSTIMULANT

IT'S TIME TO THINK DIFFERENTLY ABOUT NITROGEN.

Maximize crop potential with Utrisha[™] N nitrogen efficiency biostimulant.

Utrisha N provides a sustainable, alternative source of nitrogen that reduces dependency of nitrogen uptake from the soil and ensures the plant has access to nitrogen all season long. An effective solution for many crops including canola, corn, wheat, and soybeans, Utrisha[™] N provides crops a unique way to capture nitrogen throughout the season, helping plants reach their yield potential.

To learn more, visit the Corteva Agriscience[™] booth at *Ag In Motion 2022*.

AG IN MOTION INNOVATIONS PROGRAM

armers attend Ag in Motion[™] for the latest showcase of new products and technology that can benefit their business. Ag in Motion is hosting the 2022 Innovations Program presented by TD Agricultural Services — a celebration of the new, innovative and noteworthy in agriculture. Through this program, five awards honour pioneering technologies that have the potential to positively impact and advance the agriculture industry.

Winners and finalists were announced July 18 at the Innovation in Agriculture Reception, hosted by Ag in Motion and Agricultural Manufacturers of Canada, and presented by S3 Group. Winners and finalists will receive special signage at Ag in Motion to recognize their achievement.

Farmers are encouraged to participate in this competition through the Innovations Program Farmers' Choice Award by voting on which innovation among the five categories winners they would choose as their favourite. Farmers have until the end of day Monday, July 25 to vote on their favourite innovation online. Cast a vote by visiting the home page of the Ag in Motion's website **aginmotion.ca** and look for the Farmers' Choice Award.
