

Trial Results

Effect of Timac Agro Technologies on Canola

HUMISTART
PHYSIOPRO

TRIAL INFORMATION

Application Date

05/02/2024

Crop

Canola

Product

Humistart
PhysioPro

Site Location

Killarney, MB

OBJECTIVE

Grower is facing issues with soil salinity. Specific area was targeted and addressed in one growing season.

KEY FINDINGS

- Saw germination in previously non-yielding areas
- Sol Salts reduced from 10.6 to 5.4

APPLICATION

Product	Rate	Application	Timing
HUMISTART	100lbs/ac	Seed Row	Seeding

CONCLUSION

Significantly lowered Sol salts, saw germination in areas that previously did not have germination and improved soil structure and drainage on applied area.
