

Trial Results

Effect of Timac Agro Technologies on Canola

HUMISTART
PHYSIOPRO

TRIAL INFORMATION

Application Date

05/29/2024

Crop

Canola

Product

Humistart
PhysioPro

Site Location

Souris, MB

OBJECTIVE

Grower is facing issues with soil salinity. This was grower's first year using Humistart Physio Pro.

KEY FINDINGS

- **Removed salt lines**
- **Saw germination in areas that previously did not have germination**
- **Improved soil structure and drainage on applied area**

APPLICATION

Product	Rate	Application	Timing
HUMISTART	180lbs/ac	Broadcast	Preplant

CONCLUSION

Grower was happy with year 1. Removed white salt lines, saw germination in areas that previously did not have germination and improved soil structure and drainage on applied area.
