

The easiest and most affordable way to add aeration and drying to your bin.

Manhole Aeration offers a simple and cost-effective solution for adding aeration to hopper-bottom bins. Just install Wavcor's Manhole Aeration Cylinder, connect it to either Wavcor's Airblast fan or another brand of fan, and, if desired, attach a heater for drying capabilities. No modifications to the bin are needed and the bin can be easily entered by removing 4 bolts.

- Smooth wall or corrugated bins
- Uses the existing manhole
- Bin can be entered by removing 4 bolts
- Can be used with 3hp to 20hp+ fans
- Will deliver airflows of up to 3000 cfm
(when paired with 20hp fan)
