

TIREBOSS® 2

Tire Pressure Control

*Superior mobility in
the toughest conditions.*

KEEPS YOU MOVING

TIREBOSS® 2 Technology

Total Tire Pressure Control

With **TIREBOSS® 2** technology, you have the ability to control your truck's tire pressure from the cab of the truck.

TIREBOSS® 2 can be retrofitted to any truck and comes programmed to suit your vehicle's configuration and specific work-cycle requirements.

How does this benefit you?

Safely reduced tire pressure creates extremely low ground pressure and provides you incredible mobility in off-road environments.

HIGH PRESSURE

REDUCED PRESSURE

Create a longer footprint
and larger contact surface
area with **TIREBOSS® 2**

Over 9000 TIREBOSS® Systems are Operating Worldwide

**Look what happens when you operate
at reduced tire pressure with *TIREBOSS*® 2**

**REDUCED TIRE
PRESSURE**

**HIGH TIRE
PRESSURE**

**Gain superior traction
in sand, mud and snow.**

**"The mobility and floatation
with *TIREBOSS*® is amazing.
The tandem axle semi has
outperformed straight trucks
in the field. We have improved
harvest productivity and have
had no issues with mud build
up. We couldn't be happier"**

Jason Nelson, Nelson Farms

Additional Benefits

On top of increased mobility, expect **TIREBOSS® 2** to improve the **productivity** of your operations through:

- ✓ Significantly reduces the need to pull trucks
- ✓ Improved field access
- ✓ Reduction in ground compaction on roads and in fields
- ✓ Increased tire life
- ✓ Reduced vibration damage
- ✓ Improved fuel economy
- ✓ Effective alternative to tracks on planters
- ✓ Increased crop yield

***Allows you
to spend
more days
on the
field***

***The trusted global
leader in tire pressure
control for over two
decades.***

Our customers will attest to it

Jeremy Tischer Farms

"TIREBOSS® gets the job done!" exclaims Jeremy Tischer, a Minnesota farmer. His crops consist of sugarbeet, corn, soybean and spring wheat. And as any decent farmer in the Midwest knows, sugarbeet harvest time means a lot of mud.

So, after years of precious harvest time being wasted pulling trucks, Jeremy caught wind of TIREBOSS® and thought it was worth a try. To his delight, the system worked even

better than he hoped. "We loaded 25 tons on my semis with TIREBOSS® right away, and they all drove out of the wet fields unassisted."

Jeremy says the reputation of TIREBOSS® is spreading. "One morning, my neighbor called me. He had seven semis on the road waiting for the fields to dry up. He asked 'How can your trucks be driving through the field right now?' TIREBOSS® ' I told him. The systems work!"

Our Hardware is Tough

TIREBOSS® 2 is designed to work in the most extreme off-road conditions. Our hardware is reliable, durable and made from the highest quality products.

TIREBOSS®
**works where
you do.**

How tough?

“I heard some guys were put off by the external drive hoses, but being a mechanic myself, I knew they would be no more susceptible to damage than any other component on the truck. And I was right. We’ve had no issues whatsoever.”

Mark Stahl, Stahl Farms

TIREBOSS® 2

Tire Pressure Control

*From sales,
to installation,
to ongoing
product support,
our team is with
you, every mile
of the way.*

Touch screen controller

features

- Operator training video embedded in controller
- Interactive touch screen display
- GPS Speed monitoring with auto-inflate if speed exceeded
- Instantaneous warning of tire pressure loss
- Dual protection of air brake system
- Automatic wheel end lock valves at each wheel
- Wi-Fi capable for data transfer and program updates
- Multi-language display capable

Smaller control valve, mounts anywhere!

Clean design wheel hardware with auto shut-off valves
